OSCAR QIU

OBJECTIVE   I am a student majoring in Information Management and Information Systems, with a solid foundation in IT and programming. I am seeking a position in the IT industry, such as software development, testing, or technical support, where I can further improve my skills and grow professionally

SKILLS

Programming Languages:
Java, C#, Python, JavaScript, HTML, CSS, SQL

Frameworks & Technologies:
Spring Boot, ASP.NET Core, .NET Framework, RESTful APIs, MVC, Entity Framework

Front-end Development:
Basic experience with React.js, Bootstrap, AJAX

Database Systems:
MySQL, SQL Server, Oracle

- Proficient in writing SQL queries, stored procedures, and database design
- Experience with relational data modeling and database normalization

System Analysis & Design:

- Familiar with software development lifecycle (SDLC) and Agile methodologies
- Experienced in requirements gathering, use case modeling, UML diagrams (e.g., class diagrams, sequence diagrams)
- Able to design logical and physical system architectures

Python for Data Analysis:

- Proficient in data analysis using pandas, NumPy, and matplotlib

- Able to perform data cleaning, visualization, and basic statistical analysis
- Familiar with Jupyter Notebook and data reporting

Tools & Platforms:

Git, Visual Studio, IntelliJ tools, Postman, MySQL Workbench, PowerPoint (for system documentation), Windows & Linux environments

Soft Skills:

Team collaboration, problem-solving, technical documentation, time management

WORK EXPERIENCES

WUHAN BAIJUNCHENG TECH. CO.,LTD.

09/2024-02/2025, Developer Internship

- Understood existing code and submitted small improvement.
- Fixed small bugs and reconstructed code according to instruction
- Made unit and interface tests and learned testing process.
- Developed log and user setting modules
- Wrote code annotations, interface specifications and deployment documents.
- Learned git version control
- Attended code review and comprehended code standard of team

PROJECTS

SUPPER CANTEEN-CANTEEN MANAGEMENT SYSTEM

This system is designed for students and canteen staff. It provides a mobile web page for students to browse, order foods and management orders, and also provides back-end management for staff.

HOME OF HUASHANG – ONLINE STUDENTS COMMUNITY

This system is designed as a student forum where students can post on it. The forum is dividend several sections and include a home page. It also contains user information and setting modules.
